Weekly Test: Programming

Types, Operators, Loops & Execution Tracking

Duration: 20 Minutes
Format: Closed Book

STUDENT NAME	ROLL / ID	DATE	TOTAL MARKS
_____	_____	_____	**15 Marks**

PART A: MULTIPLE CHOICE QUESTIONS (5 MARKS)

1. What is the result of the expression `typeof (5 + "5")` in JavaScript?

A) "number"
B) "string"
C) "NaN"
D) "undefined"

2. Which operator guarantees that both type and value match during comparison?

A) ==
B) =
C) ===
D) `!=`

3. How many times will a `do...while` loop execute if its condition is initially `false`?

A) 0 times
B) 1 time
C) Infinite times
D) Throws a SyntaxError

4. What statement is used to skip the current iteration of a loop and move to the next?

A) `break`
B) `return`
C) `exit`
D) `continue`

5. Which of the following is considered a "falsy" value in boolean logic evaluation?

A) `"false"`
B) `[]` (empty array)
C) `0`
D) `"0"`

PART B: PREDICT THE OUTPUT (10 MARKS)

6. Predict the final console output for snippet #1:

```
let count = 0; for (let i = 1; i <= 5; i++) { if (i % 2 === 0) continue; count += i; } console.log(count);
```

Predicted Output:

7. Predict the final console output for snippet #2:

```
let a = 10; let b = "10"; let res = (a == b) ? (a === b ? "Exact" : "Loose") : "None"; console.log(res);
```

Predicted Output:

Weekly Test: Development & HTML

Markup, Semantics & Page Construction

Duration: 25 Minutes
Format: Closed Book

STUDENT NAME	ROLL / ID	DATE	TOTAL MARKS
_____	_____	_____	**20 Marks**

PART A: HTML QUIZ - SHORT QUESTIONS (10 MARKS)

1. Correct DOCTYPE declaration for HTML5?

Ans:

2. Tag used for highest level section heading?

Ans:

3. Attribute required for image accessibility?

Ans:

4. Semantic tag for main navigational links?

Ans:

5. Element used to create bulleted list?

Ans:

6. Purpose of the `<head>` element?

Ans:

7. Difference between `<div>` and `<span>`?

Ans:

8. Attribute to open link in new tab?

Ans:

9. Correct element for interactive form input?

Ans:

10. Semantic tag for standalone article content?

Ans:

PART B: SCRATCH BUILD CHALLENGE (10 MARKS)

Task: Build a single-section HTML page structure from scratch.

Write clean, complete HTML code on the next page (or provided space) satisfying all constraints:

- Must include full boilerplate: `<!DOCTYPE html>`, `<html>`, `<head>` with title, and `<body>`.
- Use a semantic `<main>` wrapper containing a single `<section>` element.
- Inside the section, include: an `<h1>` heading, a paragraph of text, an image with `alt` text, and a bulleted list of 3 items.
- Strict rule: No copying or external reference material allowed.
